Corporate endorsements (in Japanese phonetic order)

We welcome I-NET's announcement on the adoption of VMware Infrastructure 3 as their new data center's platform, and the planned transition to VMware vSphere 4 in the future. I-NET is now our certified VIP Enterprise Partner and VMware Authorized Consultant (VAC) partner, and is also an official member of the 15-strong "Cloud Service Provider Council" hosted by VMware. We expect to offer a "flexible choice" for business IT infrastructures as well as optimizing the "efficiency" and "control" corresponding to important customer requests by fusing I-NET's operations service and VMware's virtualization technology with the initiation of this center.

VMware K.K.
Yasuo Miki, President

KDDI is to provide a new "KDDI Wide Area Virtual Switch" network service from July following the launch of full-scale operations at I-NET's 2nd Data Center – which prides itself on being the highest spec facility in the industry.

We believe that corporate users of I-NET's data center will be able to resolve various issues concerning the concentration and aggregation of data assets using this safe and secure data facility with the "KDDI Wide Area Virtual Switch". We shall continue to provide a variety of services to I-NET.

KDDI CORPORATION
Takashi Shoji, Commissioner / General Manager of Solution I Sales Division

We would like to extend our sincere congratulations on the opening of I-NET's 2nd Data Center.

We believe collaboration towards making cloud computing an accepted reality will receive a further strong impetus from the large capacity backbone provided by our company. We shall continue to support I-NET as a powerful business partner.

SOFTBANK TELECOM Corp.
Satomi Fukazawa, Operating Officer / General Manager of Data Sales Division

Congratulations on completion of I-NET's new data center.

I-NET's 2nd Data Center's specifications – including the adoption of our cutting-edge technology – make it one of the premier data centers in the country, to ensure reliable security and handling in the event of an emergency with due consideration for the environment. We believe that this fusion of I-NET's advanced service provision strengths will ensure a high quality service is provided.

We will continue to provide strong support to I-NET for their facilities, and have great expectations for I-NET's further business development.

TAISEI CORPORATION
Kazuyuki Noro, Managing Director / General Manager of Design Division

We sincerely welcome the establishment of I-NET's new data center. We have been involved in the security systems for the new data center, with its adoption of reliable and advanced non-contact IC cards and biometrics technology, through which an advanced security system that includes ITV monitoring has been realized. We offer our continued cooperation by providing cutting-edge technology in order to realize the top standard of security in the country.

Our collaboration has mainly related to I-NET's system development, and we anticipate further business development as their business partner.

NEC Corporation
Hiromi Dan, General Manager, Kanagawa Office

We are delighted to hear the news that I-NET – as a visionary leader in the cloud computing market in Japan – has established and launched this new data center, and is thus promoting continued investment in the market and business development.

I-NET has been a solutions partner for NetSuite – as the provider of a SaaS-type business suite – ever since its introduction into the Japanese market, and we expect our collaboration to be reinforced with I-NET taking this opportunity to demonstrate its leadership in the industry.

NetSuite Inc.
Kiyohiko Azuma, President

We would like to extend our sincere congratulations on the start of full-scale operations at I-NET's 2nd Data Center.

We believe that the establishment of a data center equipped to the industry's highest standards will help provide solutions to many customers' problems.

We remain committed to building a firm partnership with I-NET through collaboration between the new data center and the advanced products and services offered by Fujitsu.

FUJITSU LIMITED
Toshiyuki Kunishi,
General Manager, Kanagawa Office

I-NET's newly opened 2nd Data Center has been established on high-performance, reliable and flexible solutions designed to be able to react to business changes in order to bring about a superior service level and environmental performance.

Storage network products provided by Brocade have been adopted as the standard for I-NET's data center. We believe services can be optimized to match the requirements of client companies who use the data center by fusing I-NET's advanced technical capabilities with the encryption solutions and data transition solutions, etc. provided by Brocade.

Brocade Communications Systems Inc.
Masakazu Aoba, President
