

**I-NET receives order for virtualization with VMware vSphere™ 4,
virtualization services commence in earnest**

I-NET has acquired multiple VMware Inc. authorized partner credentials, trained certified virtualization (*1) engineers, and is now promoting cutting edge virtualization services ranging from consultation through to system construction and operation.

I-NET has received an order for VMware virtualization from DC CO., LTD. (Representative: Norio Mori-President; Headquarters: Kawasaki-ku, Kawasaki-shi, Kanagawa prefecture; Tokyo Stock Exchange-1st section market). The latest version, VMware vSphere 4, was adopted to achieve optimal reduction of investment costs that are affected by hardware/software lifecycles and to improve availability in relation to necessary future disaster measures. Using existing software resources, these virtualization services achieve significant cost reductions by reducing power consumption through server integration, and reducing installation space and maintenance costs, etc, while also offering long-term platform support and short delivery times for the new VMware® Fault Tolerance (*2) function.

In March 2009, I-NET acquired VMware VIP Enterprise Partner certification and VAC (VMware Authorized Consultant) Partner certification from VMware Inc. (Representative: Paul Maritz-President & CEO; Headquarters: California, U.S.A). Furthermore, I-NET has concluded a Technical Account Manager (TAM) program contract, a VMware professional service, with VMware Inc. This has allowed I-NET to configure a framework that provides virtual infrastructure specialists and best practice in relation to the various demands of client companies with regards to VMware and virtualization, and also realizes advanced virtualization services benefiting from priority support provided by VMware Inc.

In addition, in order to fully utilize the advanced virtualization technology provided by VMware Inc., I-NET trained numerous VCP certified engineers and commenced virtualization services in conjunction with the operational launch of the 2nd Data Center, one of the most advanced facilities of its kind in Japan. I-NET believes that the realization of cloud computing requires a combination of data centers and virtualization technologies and that this recent order for VMware vSphere 4 virtualization is a result derived through these approaches.

*1: What is virtualization?

Virtualization is a technology that allows the running of multiple logical (virtual) servers on a single physical server.

*2: What is fault tolerance?

“Fault tolerance” refers to the provision of uninterrupted availability with no loss of data or downtime even in the event of a hardware failure.

【VMware certification acquired by I-NET】

- VMware VIP Enterprise Partner
- VMware VAC (VMware Authorized Consultant) Partner
- VCP (VMware Certified Professional) Number of certified engineers: 8 (as of end May 2009)
- VSP (VMware Sales Professional)

【VMware Inc. programs incorporated into I-NET virtualization services】

Technical Account Manager (TAM) Program

In order to support our clients' efforts to promote virtualization, I-NET has concluded a TAM contract with VMware Inc. to ensure that the virtualization plan drafting services we provide, along with optimum utilization of VMware solutions and the provision of technical expertise, remain consistent.

[Service content]

- Virtualization plan drafting support (shared targets and planning)
- Provision of technical information to optimize the utilization of VMware solutions (best practice)
- Technical support in relation to design and operational considerations
- Operational status confirmation for existing virtual environments and suggestions for improvements
- Support for virtual environment standardization
- Confirmation of response status in relation to requests for support and acceleration of support (coordination with support divisions)
- Provision of latest patches, release information
- Profiles of cases involving other companies
- Product roadmap profile (subject to NDA)

【Cloud computing proliferation activities in which I-NET participates】

VMware cloud service provider conference

The VMware cloud service provider conference was set up to create a closely-knit collaborative framework of companies disseminating VMware supervised cloud computing in Japan and companies providing related services. As one of the full members of this conference (15 full members as of June 24, 2009), I-NET proactively promotes virtualization coupled with data centers and cloud computing as the new service provision models for Japan, offering new solutions to issues such as information system operation and maintenance in anticipation of ever more advanced and complicated company information systems.

I-NET CORP. Overview

Trade name	I-NET CORP.
Headquarters	23F,Mitsubishijuko Yokohama Bldg.,3-3-1 Minatomirai,Nishi-Ku Yokohama 220-8401,Japan
Phone#	+81-(0)45-682-0800(main)
Representative	Noriyoshi Ikeda (Chairman and CEO) Shigemasa Kajimoto (President and COO)
Founded	April 22,1971
Listing	Tokyo Stock Exchange 1st Section of the Tokyo Stock Exchange(code:9600)
Business operations	Data processing service Software development
Net sales	¥25,385million(FY2008:consolidated)
Capital	¥3,203million(as of March 31,2009)
Employees	Non-consolidated 1,053,consolidated 1,712(as of April 1,2009)
Qualifications	Ministry of Health, Labour and Welfare Filed notice of Specified Workers Dispatching Undertaking
	Ministry of Economy, Trade and Industry Authorized as System integrator
	Ministry of Internal Affairs and Communications Notifying telecommunications Carrier
	JIPDEC Permitted for the Use of Privacy Marks
	JQA Acquired the certification of ISO 9001:2000 Acquired the certification of ISO14001 Acquired the certification of ISO/IEC27001
