

To the press officials

I-Net Corp.

Capital and business alliance with Haudi, Inc., smart society-related company

~Progress in support for startup companies and strengthening cooperation~

I-NET Corp.(TSE Prime : Code No. 9600, Head Office: Yokohama, Kanagawa, Representative Director and Executive President: Tomomichi Saeki, hereinafter referred to as "I-NET") is pleased to announce that we have entered into a capital and business alliance (hereinafter referred to as "the Alliance") with Haudi, Inc. (Head Office: Chuo-ku, Tokyo, President: Futa Asada, hereinafter referred to as "Haudi ") on April 24, 2025, which aims to realize a smart society (energy conservation, efficiency, and a safe and secure society) with solutions that utilize its unique IoT technology.

1. Objectives and background

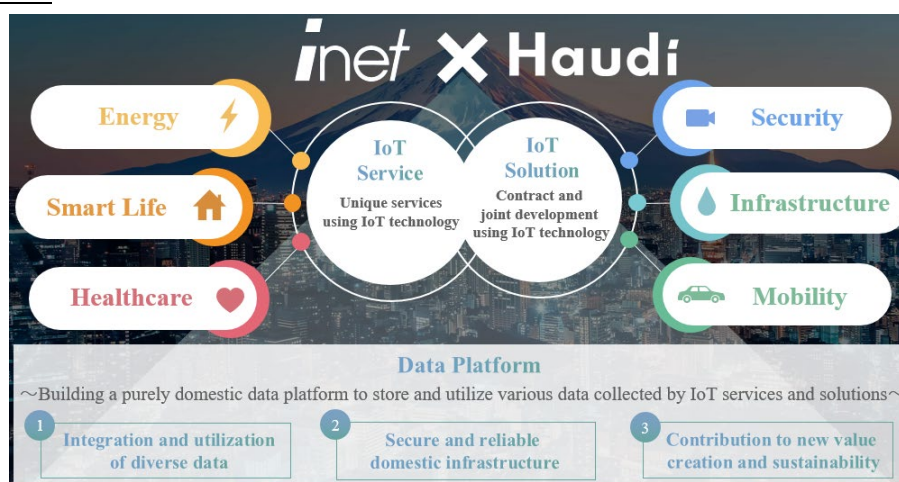

Haudi is an IT start-up company that specializes in both hardware and software development technologies, and is involved in the planning, development, sales, operation, and management of systems related to smart societies. To date, Haudi has been developing IoT service products that utilize unique technologies such as the next-generation EMS* "Familia" and the disabled-friendly smartphone-linked automatic door "Mirairo Door." With the mission of "realizing a society that is friendly to people, the earth, and the future through technology," Familia and Mirairo Door are both contributing to the creation of innovation for the realization of a sustainable society by introducing them into existing facilities and facilities.

We have been building a cooperative relationship with our IoT Solutions Division for about two years now, and as a collaborative project, we have introduced "Familia" to a large-scale indoor sports facility. In this project, the control of exhaust fans was optimized to improve heating and cooling efficiency, resulting in a reduction in electricity bills while maintaining user comfort.

By forming a capital and business alliance with Haudi, we will expand the cloud business of both companies by providing IoT services and solutions using our data center as a platform, developing IoT technologies, and strengthening our sales support system.

*)EMS:Energy Management System

2. Outline of the alliance

3. Initiatives of this alliance

- 1) By integrating and analyzing the vast amount of data collected from IoT devices at our data center, we propose and provide services that meet potential needs in a variety of fields, including energy and healthcare.
- 2) By combining I-NET's advanced data management technology with Haudi's IoT technology, we will build a platform that combines security and reliability.
- 3) By linking the knowledge and technologies of the two companies in the IoT field, we will create new services and solutions, strengthen our system for expanding our business in the future.

Futa Asada, CEO of Haudi, Inc. said the following.

“The partnership with I-NET is an important step toward the coming AI era. The vast amount of data generated by IoT will be the source of future social change. I-NET and Haudi will combine their IoT-related expertise to build Japan Quality platform. Based on this foundation, we will create innovative services in a variety of fields, including energy conservation and healthcare, and realize both solutions to social issues and corporate growth. I am confident that this challenge will open up new possibilities for the Japanese technology industry.”

Tomomichi Saeki, Representative Director and Executive President of I-NET Corp, said the following.

“I-NET feels that it is very significant to be able to form a capital and business alliance with Haudi. In order to realize Haudi's goal of a smart society, we believe it is essential to leverage the strengths of both companies in the IoT field. We hope that the collaboration between Haudi and us will contribute to the mutual expansion of our business and the resolution of various issues in modern society.”
