

To the press officials

I-NET Corp.

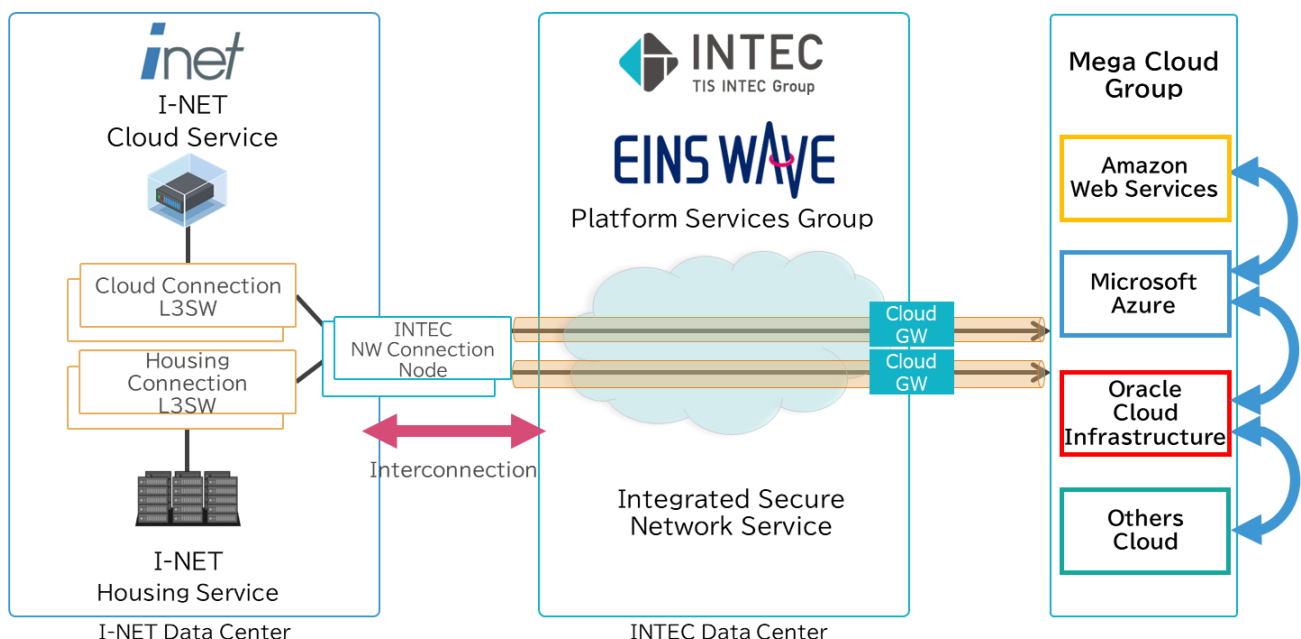

## Provision of Mega Cloud Connection Services

I-NET Corp. (TSE Prime : Code No. 9600, Head Office: Yokohama, Kanagawa, Representative Director and Executive President: Tomomichi Saeki, hereinafter referred to as "I-NET") will launch a dedicated network connection service with the Mega Cloud group from today.

INTEC Inc. (Head Office: Toyama, Toyama, President: Shuzo Hikida, hereinafter referred to as "INTEC") will provide this service as a new service by interconnecting data centers.

As customers shift to DX and IoT, the number of opportunities to use Mega Clouds is increasing dramatically. In addition to providing our own cloud service "Next Generation EASY Cloud®", we will respond to the diversifying needs of our customers by launching a dedicated connectivity service with Mega Clouds.

### <Connection Image of This Service>

### <Features of This Service>

In the past, the connection between the Mega Cloud used by the customer and our cloud and housing services had to be prepared individually by the customer or built individually by us. By providing dedicated connections to Mega Clouds as a single service, we no longer need to build them individually.

In addition, since a dedicated connection to the Mega Cloud will be built and the service will be

provided in a lump sum, it will be possible to connect to the Mega Cloud more securely with a shorter delivery time and at a lower cost than before. It will also make it easier to connect between Mega-Clouds, which is expected to dramatically improve customer convenience.

This service is based on INTEC's Integrated Secure Network Service and was realized in collaboration with INTEC. In the future, we are also considering collaborations with INTEC in the data center and cloud areas based on interconnection between data centers.

### **Endorsement**

As a result of this collaboration, I would like to express my gratitude and great pleasure to those who have worked so hard to launch I-NET's dedicated network connection service with Mega Cloud. We are confident that this service will contribute to the important positioning of I-NET to accelerate the digital transformation of our customers.

We look forward to further expanding the platform business of both companies and further developing our collaborative efforts for the growth and success of our customers' businesses.

Osamu Kimizuka

General Manager, ICT Platform Service Business Division, INTEC Inc.
